

GPS Treasure Hunt

A treasure hunt is an old favourite for getting teams working together and having fun and a great way to build teams while exploring an exciting new city!

Our fantastic Amsterdam GPS Treasure Hunt is a great way of exploring this fascinating cultural city (on foot or bike) whilst working as a team.

Our treasure hunt takes in Amsterdam's highlights by bike from the celebrated canals, house boats and narrow 17th century streets to the famous floating flower market and the House of Anne Frank. Teams use all their investigative skills to uncover the city's stories and secrets.

Biking in Amsterdam is easy and ideal for all skill levels. The terrain is flat and bikes are the ideal way to get around to see more of the Venice of the North.

No trip to Amsterdam is complete without seeing windmills and clogs! Following the river out of the city, our treasure hunt takes your team out briefly into the Dutch countryside to a cheese and clog factory and nearby ancient windmill. Teams will discover the ancient art of cheese and clog making and have an opportunity to purchase souvenirs. Don't waste the opportunity - combine the chance to see something of Amsterdam with a great team building activity.

Your team treasure hunt event in Amsterdam can be completed in a day with short flights of less than an hour from many regional UK airports. Or if you want a more leisurely approach, we can book you into one of the city's hotels, houseboats or converted merchant houses. With more time to spend you can pop on a river boat for a candlelit evening cruise, or spend time drooling over ancient masters at the Van Gogh and Rijksmuseum. If the time is right (spring) a visit to the bulb fields and world famous Keukenhof Gardens is an absolute must.

- 6 – 150 participants
- Outdoors
- Competitive
- Half-day activity
- Crack the code!

Getting new teams to gel quickly is vital in times of change, and Eventus has been fantastic in helping teams with this! Many thanks!
