

## Creative Challenge

The Creative Challenge is a fun-filled and challenging team game that lets your participants get to know each other better, think creatively and work as a team.

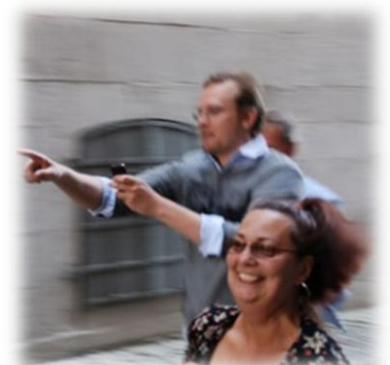

Teams of 4-5 members compete against each other in solving intriguing missions in a game area of your choosing. This could be a bustling city centre, a picturesque village or the gardens and grounds of a hotel or conference centre.

Each team is armed with a state-of-the-art smart phone - each mission is communicated through this mobile phone. Take pictures, find objects, use your creativity and beat the other teams by prioritising between missions.

The technology we use is not only great fun but also offers significant advantages. Firstly there is the "live" dimension. Missions run in "real-time" with challenging time limits for completion. Your players get instant feedback each time they respond to a question or mission. And all responses on the mobile phones is stored instantly at our control centre allowing us to oversee gameplay, let everyone know which team is currently in the lead, drop hints and offer bonuses. So real interaction! All responses by players are saved into our database and you get to know the final scores and team rankings straight away.

Finally, by investing a little more all our Creative Challenge games are fully customisable allowing us to tailor your experience. Do you have a theme that runs through your event? Is there something in particular you want to relay to your participants? Would you like to take the opportunity to gather information from your participants in a fun and creative way? If the answer to any of these questions is "yes" then Creative Challenge is the team event for you.

- 8 – 150 participants
- Outdoor event
- 2+ hours
- Hi-tech & interactive
- Creative & fun

*Everyone enjoyed the Creative Challenge activity.. We achieved our objectives of improving communication and team working, whilst having the best of laughs! We have some great pictures too!*
