

## Labyrinth

The Labyrinth is loosely based upon the popular TV game-show "The Crystal Maze". It is one of our most popular team events, being very adaptable to nearly all venues. The simple format quickly gets people working together, achieving results and having fun.

Participants, (ideally in teams of 5 to 7 people) tackle a series of intriguing team challenges. Eventus' team of event staff will set up the Labyrinth in and around your conference venue. The Labyrinth can run partly or entirely indoors - useful if the weather is poor. If you have a meeting room and access to the outdoors, then we can take the decision on the day itself - indoors or outdoors - either way you get a great event!

Within each activity zone (a cordoned-off area) lies a hidden challenge. On entering the activity zone, the team has 15 minutes to overcome the challenge contained within. Success or partial success, in overcoming the challenge will be rewarded with time bonuses to be carried forward to the final stages of the event.

At the end of the Team Challenge stage, all teams participate together in a *Finale Challenge*. Points accumulated in the first stage decide each team's position on the starting grid...however all teams are still in with a chance. Winners of the Finale Challenge are declared *Labyrinth* Champions and take home the prize!

The Labyrinth challenge can be completed purely for fun, or we can include additional time for teams to review and discuss how they are operating. Reviews can be facilitated by our (or your) facilitators or we can offer guidance and structure so that groups can self-review. Either way, we ensure that reviews keep a constructive focus helping groups to identify ways in which they can move forward.

In summary, this is a versatile and fun team building event that has wide appeal!

- 8 – 200 participants
- Indoors or outdoors
- Competitive
- Half-day activity
- Fast-paced & fun!

*The touch adopted by the Eventus team was spot-on; not too prescriptive or heavy-handed. The Labyrinth event allowed us to get into the activities quickly and start gaining good experience of working in different team mixes.*
